

Probability and Venn Diagrams

For each question, use the statements to construct a 2 or 3 set Venn diagram, with the probabilities for all regions filled in.

Question 1

$$P(A \cup B) = 0.6$$

$$P(A) = P(B)$$

$$P(A \cap B) = 0.3$$

Question 2

A and B are mutually exclusive.

$$P(A \cup B) = 0.8$$

$$P(A) = 3 \times P(B)$$

Question 3

$$P(A) = \frac{1}{2}P(B)$$

$$P(A \cap B) = P(A \cap B')$$

$$P(A' \cap B') = 0$$

Question 4

$$P(A) + P(B) + P(A' \cap B') = 1.5$$

$$P(B) - P(A) = 0.1$$

$$P(A \cup B) = 0.8$$

Question 5

A and B are mutually exclusive.

A and C are mutually exclusive.

$$P(A' \cap B' \cap C') = 0.2$$

$$P(A) = \frac{1}{3} \times P(B \cup C)$$

$$P(B) = P(C)$$

$$P(B) + P(C) - P(B \cup C) = 0.1$$

Question 6

$$B \subset A$$

B and C are mutually exclusive.

$$P(A) = 2 \times P(B)$$

$$P(A \cap C') = \frac{3}{4} \times P(A)$$

$$P(C) = \frac{1}{3}$$

$$P(A' \cap B' \cap C') = P(A \cap C)$$

Question 7

$$B \subset A, C \subset A$$

B and C are mutually exclusive.

$$P(A) - P(B) - P(C) = \frac{2}{15}$$

$$P(C) = P(A' \cap B' \cap C')$$

$$P(B) = \frac{7}{3} \times P(C)$$

Question 8

A , B , and C are all mutually exclusive.

$$7 \times P(A) + 3 \times P(B) + P(C) = 3.4$$

$$4 \times P(A) - P(B) + 2 \times P(C) = 1$$

$$P(A) + 3 \times P(B) + 3 \times P(C) = 1.8$$
